

Tee

Thanks to many years of experience, extensive range of machinery and numerous approvals (API, GOST etc.), RMA is in a position to offer its customers a large number of design forms.

The production range comprises hot extruded tees as well as tees with welded branches. A further variant are tees with guide bars or sphere tees for special pigging applications.

The choice of nominal sizes, pressure ratings and material is almost limitless.

We will gladly check your specifications and submit a quotation conform to your requirements.
